

Press Brake Tool Storage

Improperly Stored Punches and Dies

- Ergonomically inefficient — causing the operator to bend down to reach tooling
- Costly replacement of damaged punches and dies
- Inability to effectively see inventory of tooling

Capacity Per Shelf Available

www.rack-eng.com/glide-out

- Vertical storage allows for up to 40% more storage
- UHMW lined channels eliminates surface to metal contact

- Reduces costly machine down time by having quick visual access to all tooling
- 100% extendable shelf provides full access to sectional die tooling
- 3/32" deflection fully loaded
- Ability to store American and European Tooling

Sheet Metal Storage and Retrieval Folding Sheetmaster

- **Gain Manufacturing Floor Space**
 - By utilizing vertical space and still gain access to multiple types of sheet steel
- **Gain Aisle Way Space**
 - By being able to load and unload with an overhead crane
- **Reduce Machine Down Time**
 - By placing a Sheetmaster next to a shear, turret punch, or laser
- **Reduce Man Hours**
 - By eliminating a forklift driver when material change over is necessary
- **Reduce Injuries**
 - Caused by man handling heavy sheet products

5,500# Per Shelf Capacity

Available Options:

- **Fork Guides**
- **Decking on Shelves**
- **Rear Forklift Bumper**
- **Custom sizes**
- **Custom colors**
- **Rear Loadable**
- **Bi-Directional**
