

CRANK-OUT CANTILEVER

RACK ENGINEERING DIVISION (RED)

CRANK-OUT CANTILEVER

The Crank-Out Cantilever is ideal for storing and retrieving heavy bar stock, tube, pipe and extrusions.

The Crank-Out Cantilever allows for overhead accessibility with a 100% extension of its fully loaded cradle arms. The extension crank is simple and easy to use. Adjustable multiple stock dividers are available for added inventory flexibility.

STANDARD FEATURES

- High density storage
- 100% extension shelves
- Space efficiency

OPTIONS & ACCESSORIES

- Intermediate support (up to 20' long)
- Stock dividers (all welded or adjustable)
- UHMW lined arms
- Custom colors
- Single or double sided units

Depth	62"		70"		82"		94"	
Capacity	6,600 lbs. per arm		5,600 lbs. per arm		4,800 lbs. per arm		4,200 lbs. per arm	

** Each upright has a 20,000 lbs. capacity stationary top*

Rack Engineering Division provides a number of innovative solutions that are specific for each type of application. Custom sizes available upon request. Please contact us at rackinfo@rack-eng.com for more information.

ABOUT US

Rack Engineering Division (RED) specializes in the manufacturing of racking and storage solutions that are heavy duty and constructed to endure high capacities and tough industrial environments. Rack Engineering Division was originally founded in 1935 in response to an industry need for cost effective solutions to storage and handling problems for raw materials and tooling while helping customers save time and space by optimizing workflow. Since this time we continue to solve high capacity storage challenges with a quality product supported by a wide network of distributors and integrators throughout North America.
