

# VERTICAL SHEET STORAGE SYSTEM

## RACK ENGINEERING DIVISION, LLC

### VERTICAL SHEET STORAGE SYSTEM

Rack Engineering Division, LLC Vertical Sheet Storage System provides high density storage for the largest metal sheet, plate and remnants. The roll-out shelves provide ergonomic access to sheets for movement via crane, hoist or vacuum. The unique design allows for any user to easily view the stored material for selection leading to less material waste. This unit is manufactured for each customer depending on their size and volume requirements. Weight capacities up to 2,000 lbs per shelf.

Custom shelf quantities, sizes, capacity and options are available to suit your storage needs, for additional information please contact Rack Engineering Division, LLC.

### STANDARD FEATURES

- High density storage
- 100% extension shelves

Compact Storage

### ABOUT US

Rack Engineering Division, LLC specializes in the manufacturing of racking and storage solutions that are heavy duty and constructed to endure high capacities and tough industrial environments. Rack Engineering Division, LLC was originally founded in 1935 in response to an industry need for cost effective solutions to storage and handling problems for raw materials and tooling while helping customers save time and space by optimizing workflow. Since this time we continue to solve high capacity storage challenges with a quality product supported by a wide network of distributors and integrators throughout North America.
